**Structure and mechanism of action
of two bacterial enzymes:
MltE from *Escherichia coli* and
AspB from *Bacillus* sp YM55-1**

Cover : AspB (front) and MltE (back)

By: Guntur Fibriansah

The research presented in this thesis was carried out at the Protein X-ray Crystallography group, Laboratory of Biophysical Chemistry, Groningen Biomolecular Science and Biotechnology Institute, Faculty of Mathematics and Natural Sciences, University of Groningen, The Netherlands.

RIJKSUNIVERSITEIT GRONINGEN

**Structure and mechanism of action of two bacterial enzymes:
MltE from *Escherichia coli* and AspB from *Bacillus* sp YM55-1**

Proefschrift

ter verkrijging van het doctoraat in de
Wiskunde en Natuurwetenschappen
aan de Rijksuniversiteit Groningen
op gezag van de
Rector Magnificus, dr. E. Sterken,
in het openbaar te verdedigen op
maandag 9 juli 2012
om 12.45 uur

door

Guntur Fibriansah

geboren op 20 februari 1981
te Cirebon, Indonesië

Untuk Bapa dan Mamah

For my parents

Untuk Intan, Nadia, Azka dan Hanae

For Intan, Nadia, Azka and Hanae

Contents

Chapter 1

An introduction: lytic transglycosylases and aspartate ammonia lyase

Page 11-64

Chapter 2

Structural analysis of glycan binding by the endospecific lytic transglycosylase MltE
from *Escherichia coli*

Page 65-98

Chapter 3

Structural basis for the catalytic mechanism of aspartate ammonia lyase

Page 99-130

Chapter 4

Crystal structures of two PadR-like transcriptional regulators from *Bacillus cereus*

Page 131-160

Chapter 5

Summary, general discussion and future perspectives

Page 161-176

Nederlandse samenvatting

Page 177-188
